The diagram illustrates a multi-stage electrostatic actuator system, labeled 10. It consists of several interconnected components:

- Power and Control Section:**
 - 12:** Input power source.
 - 13:** A switch or relay mechanism controlled by **13a** and **13b**, connected to a battery symbol.
 - 11:** A control unit or sensor connected to the main system.
- Actuator Stages:**
 - 5:** The main actuator assembly, featuring a series of stages with components labeled **14** and **15**.
 - 10A, 10B, 10C, 10D:** Individual actuator stages or components.
 - 18, 19, 20, 21:** Specific internal components or contacts within the stages.
 - 30:** A component, possibly a spring or damper, associated with stage 10D.
 - 31:** A component, possibly a sensor or actuator, associated with stage 10A.
- Electrical Connections:**
 - E1, E2, E3, E4, E5:** Designated electrical connection points or lines linking the various stages and control units.
 - P1:** A specific connection point or terminal.

The diagram shows the mechanical and electrical layout of the system, with arrows indicating the flow of power and mechanical movement.
